

Free standing lace instructions

FSL notes

- Use 1 or 2 layers of wash away stabiliser.
- To avoid misalignment issues & puckering, use 2 sided tape on the inner hoop. See hooping hints.
- Use the same colour as the outline edge as your bobbin thread
- Embroider your design.
- Remove from the hoop & trim away excess stabiliser & loose threads.
- Rinse away excess stabiliser.
- Soak lace in hand hot water for 5-20 minutes, the longer it soaks the more stabiliser residue is removed & the softer it gets.
- Squeeze excess stabiliser out until it no longer feels sticky.
- Drip dry, or towel dry flat, re-soak if required to soften further.

Use 1 or 2 layers of wash away stabiliser

Use the same colour as the outline edge as your bobbin thread

Remove from the hoop & trim away excess stabiliser & loose threads

Rinse away excess stabiliser

Soak lace in hand hot water for 5-20 minutes

Drip dry, re soak if required to soften further

Shape your lace or lay flat to dry
